Date:6/08/2022

Hiroshima Day is observed on August 6 to commemorate the atomic bombing of Hiroshima, Japan, in 1945, at the end of World War II. An estimated 80,000 people died instantly from the blast, while the effects of radiation killed tens of thousands more within the months and years that followed. Hiroshima Day, observed at the Hiroshima Peace Memorial Park, Japan, highlights the effects of nuclear wars, pays respect to those who got killed, discourages nuclear proliferation and promotes world peace. On the 77<sup>th</sup> anniversary of the event, we look at the history, key facts and significance of Hiroshima Day. RIAH challenges the assumption that violence is innate to the human condition and seeks to equip students with the capacity to resolve conflict without violence. Peace education prevents the emergence of conflicts and creates conditions for peace in the world. Hiroshima Day is a plea of peace to all world powers to prevent such horrors from ever repeating.

Best Regards
