Shaping The Future: The Creative and Curious Minds of Generation Beta

As we celebrate Children's Day, we turn our attention not only to the remarkable children we see before us today but also to the future—one shaped by the creative, curious, and innovative minds of Generation Beta. Born between 2025 and 2036, Gen Beta will grow up in a world like no other, a world characterized by unprecedented technological advancements, global diversity, and rapid change. These children will be immersed in a world where hyper-tech integration, artificial intelligence, and automation are part of their daily lives, transforming the way they learn, work, and interact.

The generation we are nurturing today will live in a future where curiosity is on overdrive. With access to AI, immersive digital experiences, and cutting-edge technology, Gen Beta will be exposed to limitless opportunities to explore, experiment, and innovate. They will not just consume information—they will create, design, and solve problems in ways we cannot even fully imagine yet. The world will demand innovative minds, and this generation will be ready to deliver.

But it won't just be about technology. Gen Beta will grow up in a highly interconnected world, where diversity, inclusivity, and adaptability will define their values. They will live in a globalized society, where understanding different cultures, languages, and perspectives will be crucial to their success. As they navigate a world shaped by constant change, they will value inclusion, collaboration, and the pursuit of equality. Their ability to adapt and thrive in diverse environments will be one of their greatest strengths.

So, what will shape the lives of Generation Beta? The answer lies in the experiences, education, and guidance we provide today. As parents, caregivers, and educators, it is our responsibility to lay the foundation for a world where these young minds can thrive—a world filled with opportunities, love, and understanding. We must ensure that they have the tools to navigate the complexities of tomorrow, while also nurturing their creativity, critical thinking, and emotional intelligence.

On this Children's Day, let us pledge together to create an environment where the children of today and tomorrow can grow to their fullest potential. Let us encourage them to embrace curiosity, foster innovation, and embrace diversity. Let us guide them with empathy and provide them with the support they need to become the compassionate, resilient, and visionary leaders of the future.

Happy Children's Day to all our wonderful students. The future belongs to you, and we believe you will shape it in ways that will make the world a better place for all.

EVENTS

Rhapsody - Literary Fest 2024 - Mont to Grade VII

Ryan International Academy, Sarjapur proudly hosted its most awaited event, "Rhapsody- Literary Fest 2024," on 23rd November 2024 i.e. Saturday. We were extremely delighted to welcome our students, other school participants and honorable judges. It was a wonderful day dedicated to celebrating the beauty of literature and creativity. Everyone witnessed the vivid diversity and cultural richness through literature.

The aim of the event was to promote literacy, creativity and intellectual development and to gain an exciting and enriching experience. The event commenced by seeking divine blessings for the success and smooth conduct of the event's proceedings, followed by a welcome speech.

The Judgment Panel was welcomed and felicitated. Respected Principal - Ms. Sripurna Sarma delivered a welcome speech, emphasizing the spirit of creativity and learning in this literary adventure. The melodious Welcome Song was sung by the students. The audience was thrilled by a splendid rendition of Dance Drama performed by students highlighting "Unity in Diversity" depicting the culture and tradition of different states. Young authors were introduced to the audience, and they gave a summary of their book launch and shared their inspiration behind it.

Mesmerizing fancy dress competition at Fabled Fashion Showcase, artistic Bookmark Atelier, brainstorming Verbal Voyage,

EVENTS

thrilling spelling prowess competition at Syllable Spectacle, on spot riveting Minute to Win It: Speech Edition, visionary Possibility Parley and rhythmic poetic Limerick Lyricism. Syllable Spectacle was well implemented and truly proved to be an exemplary specimen of spontaneity and collaborative teamwork.

It was indeed an amazing competitive event. The event effectively promoted reading and a love of literature and writing. The Head Boy, on behalf of school management, extends its gratitude to one and all associated with the event in ensuring the efficacious completion of "Rhapsody-Literary Fest 2024".

Lead By Example (LBE) Mont to Grade VII

Once again, Ryan Education has provided a platform for the facilitators to showcase their exemplary work as well as to learn from each other by announcing Lead by Example 2024-25. Ryan International Academy, Sarjapura proudly hosted its most awaited and prestigious event, "Lead By Example 2024-25 - City Round," on 30th November 2024 i.e. Saturday. We were extremely delighted to welcome honourable judges and versatile facilitators as participants. It was a wonderful day celebrating excellence.

The aim of the event was to witness the stellar presentation by dynamic facilitators depicting their innovative methods, strategies, techniques and activities that were implemented during the course of time, ensuring a superlative learning experience for the students under their guidance.

EVENTS

We all know that teachers not only inspire students every day but also create a fun way of learning, starting from inhibiting discipline, conducting quality circle time, inculcating personality development activities, and building confidence till concept clarity of the subject. And after all this, settling the doubts through remedial classes also. Facilitators deal with students by applying different teaching methodologies because every child is unique and bears special skills.

The event commenced by seeking divine blessings for the success and smooth conduct of the event's proceedings, with the Lord's Prayer followed by a special Prayer.

The Judgment Panel was welcomed and felicitated by the Respected Principal - Ms. Sripurna Sarma. She delivered a motivational welcome speech. The judgment criteria were properly explained to the judges before the commencement of the event. Proper announcements regarding the ground rules of the competition were made clear to the participants. Participants were called upon as per the sections- Pre-primary, Primary and Middle School respectively. All the presentations were a wonderful amalgamation of visual aids, hands-on activities, experiments, introducing TLMs, etc. The level of the competition was at its apex through a series of phenomenal works presented by splendid educators.

Participants were awarded a certificate by the honourable judges. It was indeed an amazing competitive event. The event effectively promoted exemplary efforts that were put in by the facilitators during their classroom conduct. It's merely a celebration

of the hard work invested by educators in building the radiant future of young minds through their holistic development.

ACADEMIC ACTIVITIES

Counting Numbers from 1 to 10 with Ice Cream Making Activity - Mont I

Number Recognition: Children will learn to recognize the numbers from 1 to 10.

Counting Skills: By adding scoops to the cones and counting out loud, children will practice one-to-one correspondence.

Fine Motor Skills: The activity involves placing scoops on cones, helping children refine their hand-eye coordination and fine motor skills.

Activity of Making Ice Cream: For each number, children added the correct number of scoops of ice cream to their paper cone. Example: For the number 1, place 1 scoop of ice cream on the cone. For the number 2, place 2 scoops, and so on, up to 10.

The children were encouraged to count aloud as they place each scoop on their cone. This reinforces the concept of one-to-one correspondence and helps with counting skills.

This ice cream-making activity not only makes counting fun but also encourages creativity and hands-on learning.

ACADEMIC ACTIVITIES

Matching and Identifying Upper and Lower Case letters - Mont II

Matching and identifying upper and lower case alphabets is a key literacy skill for young learners. This ability helps children connect the two forms of each letter, building the foundation for reading and writing. Recognizing that 'A' and 'a' or 'B' and 'b' represent the same letter enhances reading fluency and comprehension while understanding their relationship aids in developing proper writing habits.

Despite its importance, this skill can be challenging for children. Some letters, like 'C' and 'c' or 'O' and 'o,' have similar shapes in both forms and are easier to identify.

However, letters such as 'G' and 'g' or 'Q' and 'q' can appear significantly different, confusing. Additionally, limited exposure to both forms in early learning materials may delay the ability to match them.

To make learning engaging, teachers use interactive activities. Matching games with flashcards or magnetic letters allow children to practice pairing upper and lower case letters. Tracing exercises help them internalize the shapes of both forms, while puzzles and hands-on activities, like pairing blocks or objects, make the process enjoyable. Songs, rhymes, and picture books featuring both cases further reinforce learning in a fun and memorable way.

Regular practice not only strengthens letter recognition but also builds confidence in literacy skills. Children who master this skill can transition smoothly to more advanced tasks, such as phonics, word recognition, and sentence construction.

Matching and identifying upper and lower case alphabets is a vital step in early education. With engaging methods and consistent practice, children can develop this skill effectively, ensuring they are well-prepared for future reading and writing Challenges.

ACADEMIC ACTIVITIES

National Symbols - Mont III

The Mont III students enthusiastically participated in the National Symbols activity, which was both educational and engaging. The activity began with students identifying various national symbols using a wooden puzzle tray. This hands-on approach piqued their curiosity and helped them recognize symbols like the national flag, emblem, bird, animal, and flower.

Next, the class engaged in an interactive discussion using a soft board display. Students explored the significance of each symbol and learned what it represents in the context of India's heritage and pride. The conversation encouraged critical thinking and allowed the children to share their perspectives on why these symbols are important to our nation.

To conclude the activity, the students participated in a lively National Symbols Rally within the classroom. Holding props and drawings of the national symbols, the students marched proudly, reinforcing their understanding and showcasing their creative expressions.

This activity helped deepen the students' awareness of India's cultural identity and instilled a sense of patriotism. It was a memorable learning experience for all.

CELEBRATIONS

National Milk Day Celebration - Mont I to III

On the occasion of National Milk Day, students from Mont I to III actively participated in engaging activities to understand the importance of milk in our daily lives.

Mont I & II students explored their creativity through a fun art activity where they decorated a glass of milk by sticking cotton, symbolizing the purity and freshness of milk. This activity enhanced their fine motor skills and creativity while instilling the value of milk as a wholesome drink.

Mont III students participated in a drawing competition where they illustrated cows, learning about the significance of cows in milk production. They were also introduced to the process of how milk is obtained from cows and processed in factories before it reaches us. This activity helped them understand the journey of milk from farm to table and appreciate the efforts of farmers and workers in the dairy industry. The event successfully highlighted the importance of milk as a nutritious and essential part of our diet, leaving the students enriched with knowledge and creativity.

Children's Day Celebration Mont I to VII

Every child is unique in their way and every child is loved by all. We at Ryan International

CELEBRATIONS

Academy, Sarjapur celebrated Children's Day on Thursday, 14th November 2024 with grand splendour and fiesta. The day marked the birth anniversary of Pandit Jawaharlal Nehru, fondly remembered by children as "Chacha Nehru"

The Children's Day celebration began with an enthralling special assembly, dedicated to the students by their educators. It started by seeking the blessings of the almighty through the Lord's Prayer, Scripture Reading, Special Prayer, Praise and worship songs, followed by the message from honourable Chairman Sir Dr. A. F. Pinto, which embarked the students with words of wisdom. A power-packed performance was presented by the teachers, which included a melodious song performance, and a mesmerizing dance performance. The respected Principal, Ms. Sripurna Sarma, addressed the assembly. A short video was played during the assembly for students which brought a smile and excitement to their faces. The assembly ends with the Ryan Pledge, the School Anthem and the National Anthem.

It was a fun-filled day for the students as they participated in various games, like musical chairs, circle time, board games, etc. Competitions were conducted at different grade levels ranging from Mono Acting, Show and Tell, Poetry Recitation, Creative or Poetry writing and Elocution competition.

The day was commemorated with immense joy, enthusiasm and magnificence as it was

CELEBRATIONS

the time for a “cake-cutting ceremony and class party” for the children of our school. The campus was buzzing with excitement and joy as it was a day wherein fun and frolic dominated. There was excitement in the air and the Ryanites left the school with their takeaways in the form of greeting cards, bookmarks and a bag full of stories about their special day at school. The celebrations came to an end with the distribution of chocolates as a small token of love and affection by the school.

Thanksgiving Day Celebration - Mont I to III

Thanksgiving Day was celebrated with great enthusiasm by our Mont I to III students on 22nd November 2024. The highlight of the celebration was the “Waste Out of Waste” Card Making Competition, aimed at promoting creativity and gratitude.

Students actively participated by bringing recyclable materials such as newspapers, cardboard, fabric scraps, ribbons, and more. With these items, they crafted beautiful gratitude cards dedicated to their elders, showcasing their creativity and appreciation.

The event was a wonderful way to instill the values of gratitude and sustainability, leaving everyone with cherished memories and a deeper understanding of the importance of giving thanks.

COMPETITIONS

World Public Transport Day - Mont I to III

World Public Day transport was celebrated with enthusiasm at Ryan International Academy, Sarjapur. The event aimed to raise awareness about the importance of sustainable transportation. Students participated in a vibrant role-play activity, where they dressed as various modes of transport and came prepared with props to enhance their presentations. Each student took the stage to speak passionately about their favourite mode of transport, sharing reasons for their choice and highlighting its uses and benefits. This interactive experience helped students understand the significance of different transportation types and the impact of public transport on the environment.

Additionally, Mont III students conducted a special assembly dedicated to World Transport Day, further enriching the celebration. Through this event, students learned about the advantages of public transport, teamwork, and public speaking skills, making it a fun, educational, and memorable day for everyone involved.

SPORTS

Master the Ball, Own the Game. Every Dribble Counts Mont III

Dribbling in football is an important skill that helps players move the ball while maintaining control. For Montessori students, dribbling can be a fun and engaging activity that encourages both physical movement and concentration. In a Montessori setting, the focus is on creating an environment where children can explore and develop their skills at their own pace.

Dribbling is when a player uses their feet to push or tap the ball forward while walking, running, or changing direction. This allows players to move the ball across the field and avoid opponents. In a Montessori context, it is best to introduce dribbling as a gentle, controlled movement rather than a competitive activity.

Benefits for Montessori Students:

Gross Motor Skills: Dribbling helps children develop strength, coordination, and balance by moving their bodies and controlling the ball with their feet.

Concentration and Focus: As students practice dribbling, they need to pay attention to the ball, their feet, and their surroundings, which helps improve focus and attention span.

Independence: The Montessori approach encourages children to take ownership of their learning. Dribbling allows them to work independently, exploring different ways to move the ball and improve their skills at their own pace.

ACADEMIC ACTIVITIES

Social Skills: When children practice dribbling together, they learn cooperation and teamwork. They can share the ball, practice passing, and take turns, which fosters social interaction and group play.

MUSIC

Where Words Fail, Music Speaks – Nurturing Hearts and Minds in Harmony Mont III

Music is an integral part of the Montessori learning experience, bringing joy, creativity, and growth into every child's day. In our classrooms, music is more than just an activity—it's a pathway to self-expression, cultural appreciation, and holistic development.

Montessori education emphasizes the connection between the mind, body, and emotions, and music beautifully bridges these areas. Through singing, instrument exploration, and movement, children develop skills that go beyond melody and rhythm.

Music Nurtures:

- **Language Development-** Singing familiar songs builds vocabulary and enhances pronunciation.
- **Mathematical Thinking-** Patterns in rhythm and beats lay a foundation for early math skills.

MUSIC

- **Emotional Growth-** Music allows children to express their feelings and connect with others.

How We Incorporate Music:

- **Daily Routines-** Simple songs guide transitions between activities, creating a joyful and structured environment.
- **Cultural Exploration-** Children are introduced to music from around the world, deepening their understanding of global traditions.
- **Hands-On Learning-** Instruments like bells, maracas, and drums are used to explore sound, rhythm, and coordination.
- **Listening Skills-** Quiet moments of listening to classical or nature-inspired music help children build focus and appreciation for beauty.

INNOVATION

Festive Card - Mont III

The Festive Card activity nurtured creativity and introduced basic electrical concepts to young children in an engaging way. Students gained confidence by combining art and science, seeing how simple circuits could be integrated into everyday objects. This project fostered problem-solving as they trouble-shooter connections to make the LED glow. It enhanced collaboration when working in groups and provided early exposure to STEM principles through hands-on learning.

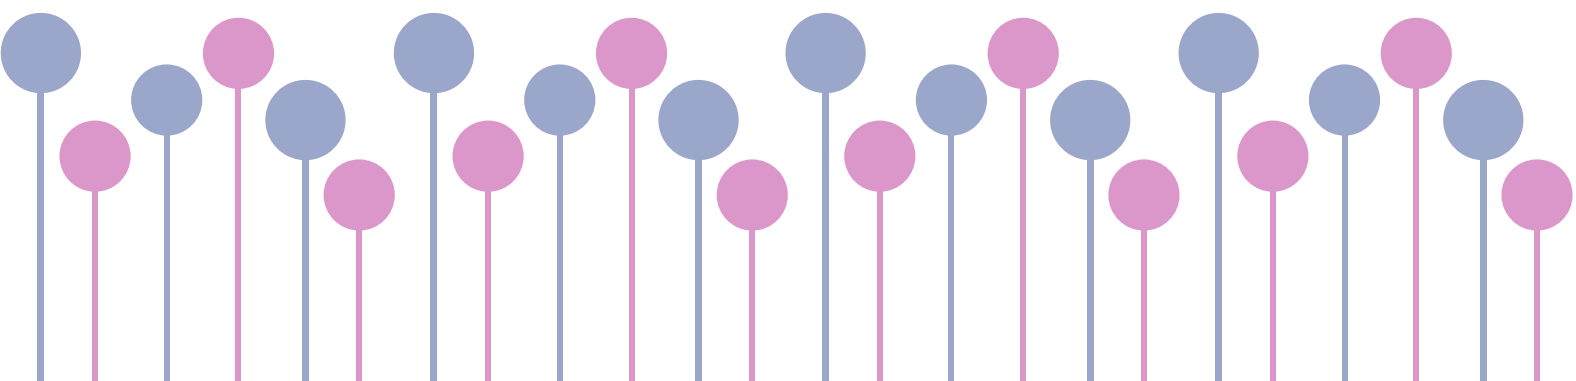

PARENT'S CORNER

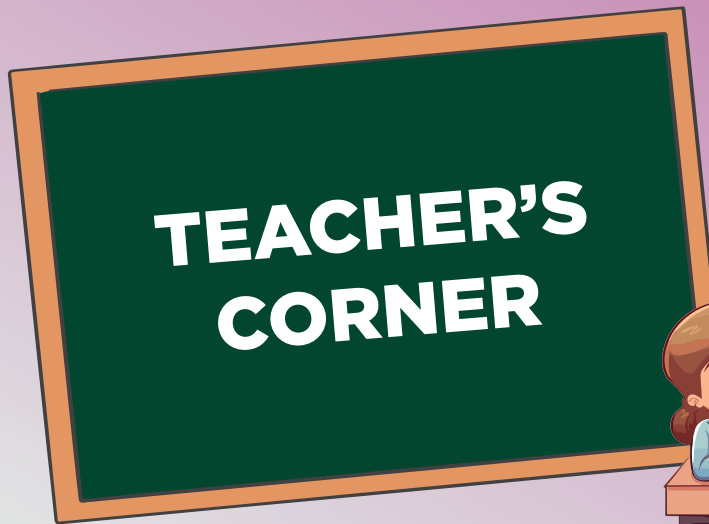

Our kid Svojas Singh joined Montessori III this year in RYAN, Sarjapur. We were very impressed with the facilities, academic program and planned co-curricular activities for Mont III students. This is the first proper school for my kid and we were skeptical of him getting adapted to the school life and may have some challenges in the initial days. But we were equally surprised and delighted to see that he not only stayed in school for the entire duration but also was very happy.

As of now, we are very happy and satisfied with the kid's progress and the number of opportunities he is getting to build confidence. Appreciate the Principal and teachers to put their efforts and focus on each child and grooming them with care. Regular monthly feedback also helps us get up to date with the Child's progress. The Star of the Week program is a confidence booster for him. My Child is really happy and showing a lot of improvement in him.

- Mr. Prakash SK

Father of Svojas Singh, Mont III 'B'

As the heart of our school community, our teachers are the driving force behind the success and growth of each student. In this month's Teacher's Corner, we want to shine a spotlight on the incredible dedication, passion, and commitment our educators bring to the classroom every day.

Teaching is more than just a job; it's a vocation. Our teachers play many roles—guides, mentors, problem-solvers, and sometimes even counselors—always to nurture young minds. They create environments where students feel safe to ask questions, make mistakes, and explore new ideas. It's in these classrooms that curiosity is sparked, confidence is built, and futures are shaped.

The challenges of teaching today are greater than ever, but our teachers rise to meet them with resilience and creativity. Whether incorporating the latest technology, adapting to different learning styles, or working late into the evening to ensure every student succeeds, they continuously go above and beyond. In doing so, they not only teach lessons but also impart life skills such as perseverance, collaboration, and critical thinking.

As we celebrate our teachers, let's also remember the importance of supporting them. Whether through appreciation, understanding, or advocating for better resources, we all play a role in helping them succeed so they can continue to inspire and educate our children.

Thank you to all of our teachers for your unwavering dedication and the incredible difference you make in the lives of our students. Your impact is immeasurable, and we are grateful for each of you.
