

## From the Principal's Desk

### Teaching, Technology and Education

Many times we are coerced and cajoled into a profession one is least interested in. But somewhere down the line this abominable profession becomes our passion and one learns to excel in it.

What was once considered as a housewife's profession has resurrected itself as the most challenging and demanding job. From coping up with the needs of the family and dealing out classroom instructions, teachers have embellished way beyond one's apprehension.

Besides this teachers and teaching have flourished incorporating technology into teaching. Teacher's secrets to success has been in the planning and implementing these instructions into their teaching which has paved a path for prosperity for the learners.

This unreasonable and impossible job of teaching to ignite the young minds of the learners lies in the delicate yet sturdy shoulders of teachers. The whole and sole ambition of teachers lies in the aim to spark the lamp of learning, trigger to quench the thirst of gaining knowledge.

Thus, teachers have turned to the aid of technology. Technology is a **FORCE MULTIPLIER** for the teacher. Instead of the teacher who at a point of time was the only source of help in a classroom is no longer the sole bearer of the burden of teaching and learning. Technology is equated to a **TEACHER LIBERATOR**. But before this the novice (teachers) had to master their skills(technology). In fact, to re-establish the role of teacher, inculcating values within and outside the classroom, teachers and technology have to formulate a collaboration, a partnership which helps to create a community which nurtures, encourages and supports the learning and teaching process.

Technology makes the classroom - learner centered. Strongly encompasses methods of teaching that shift the focus of instruction from the teacher to the student. Keeping in mind the multiple intelligences present in a classroom situation, technology unfolds many new methods of learning. Be it linguistic, spatial, bodily kinesthetic, logical, mathematical –technology has an appropriate response to all.

Technology has the ability to enhance the relationship between teachers and students. Teachers effectively integrate technology into subject. Teachers grow into roles of advisors, content experts, and coaches. Technology helps make teaching and learning more meaningful and fun.

Technology stimulates the Teaching and Learning process. Technology provides the teacher with numerous tools that they can use. Technology also has the power to transform teaching by ushering in a new generation of teaching skills. Technology links teachers to their students and to professional content, resources, available in various forms to help them improve their own instruction and personalize learning in and out of the classroom. Technology augments the student learning process which is the key to success.

The role of educational technology in teaching is of great importance because of the vast and immense information and communication technologies present with the ever-evolving technology which is adamant. Distance education, satellite classrooms is also made possible due to technology. The Internet teachers and the internet students has opened doors to the inaccessible class and mass of learners.

Principal, RIA Horamavu

### Quote of the month

*"Do not judge me by my successes, judge me by how many times I fell down and got back up again."*

**- Nelson Mandela**

***Never give up! Strive till you are successful. Change is constant. Where there is a down there is always an up.***

**EVENTS AND ACTIVITIES AT SCHOOL**

# Activities

## Parent Orientation Programme

Parent Orientation Programme held on 10th of July at Ryan International Academy. Principal introduced her teachers and her team explaining to parents about the rules and regulations followed at school. Kids are engaged with teachers during parent orientation programmes.

*Education is the most powerful weapon, which you can use to change the world.*

– Nelson Mandela

## First Day Of School

*Goodbye vacation! Hello to school! Hello new class, good bye pool.*

*Vacation time is over, school time is here. Now we welcome a new school year.*

Schools always carry beautiful memories for everyone. But when talking about the first day of school, a series of emotions engulf us. Schools are the epitome of receiving knowledge and the first step toward the outside world.

The kids are all excited and engaged with the first day of activities and take always.

## Academic Activity

Mont kids concentrate on writing as writing helps Children learn to read. As they are visually tracking what they are writing, the brain is even more engaged. Children who spend more time working with a pencil and paper than typing have stronger reading and spelling skills because writing activates the parts of the brain that also controls reading.

## Innovation Academy

Mont kids engaged with innovation academy activities.

Curious faces of grade II 'A' kids during their Innovation Session on - Material Exploration. They

# Activities

also learned about the properties of material such as soft/hard, flexible/rigid, rough/smooth, elastic/non-elastic, light/heavy, strong/weak, absorbent /waterproof etc. Sensory activity is the type of activity that stimulates children's senses which are the different ways we perceive the world. Our brains use senses to help us manoeuvre in our surroundings and sensory play helps children develop them.

## Assembly

Morning School Assemblies helps Students to instil confidence, discipline, and moral values in students. It fosters a sense of belonging and solidarity among students.

## Sports Activity

Mont kids taking part in sports are important for children as it reduces stress and enhances their mood. A sport builds healthy bones and muscles, increases fitness, improves sleep, helps them socialize. It also improves their cooperation skills, boosts self-confidence, and lowers the risk of getting obese.

## Star of the week

Star of the Week is a popular way to celebrate children's achievement. One child from each class is chosen each week in recognition of a great piece of work, good behaviour, kindness, or going above and beyond in some way. It's a great way to motivate children and share in success together.

# CELEBRATIONS

## Environmental Day

World Environment Day is celebrated annually on 5th June and encourages awareness and action for the protection of the environment. It is supported by many non-governmental organizations, businesses, government entities, and represents the primary United Nations outreach day supporting the environment.

Mont kids celebrate the importance of environment.

## Father's day

A father's love is unconditional. He loves, cares and struggles hard to make our days better and brighter. Everything he does for us is what only a superhero can do. Mont kids celebrating Father's Day on 20th of June 2023.

## World Music day

Music ignites all areas of child development and skills for school readiness, including intellectual, social-emotional, motor, language, and overall literacy. It helps the body and mind work together.

Mont kids at Ryan International Academy being exposed to music to learn the importance of sounds and music.

# CELEBRATIONS

## Yoga Day

Yoga helps strengthen children's growing bodies and helps them improve their flexibility, which can reduce their chance of injury. Yoga teaches discipline and reduces impulsivity. Yoga can reduce challenging behaviours in the classroom by providing a physical outlet for children to express themselves.

Mont kids celebrating yoga day on 21st of June 2023.

## Red Day

"Red is the colour of fire and passion. Let your inner flames burn bright on Red Color Day." "Red is the color of love and affection. Cherish your loved ones on Red Color Day."

Mont kids at Ryan International Academy celebrating Red colour day on 23rd June 2023.
