FREEDOM FROM THE PRISON OF BOREDOM...

How do we free a child from the prison of boredom?... Learning becomes an unattractive proposition if it's based on pain, excessive exertion, threats and shame... Let's infuse affection, sensitivity and attention into the school environment to cater to the needs of the mind, body and spirit of the children and attain each child's developmental milestones... Beyond a vibrant intellectual space and well equipped physical infrastructure, lies a very sensitive and crucial component that pertains to love and belonging... It's the abundance of love, caring, sensitivity and reassurance that makes the student feel secure... When the students feel that they 'belong' to school and the school 'belongs' to them, the school-student relationship translates into one based on trust and understanding than transaction... Foundation of this trust will generate in students an enthusiasm for learning and knowledge...

The fact that most of the time we are going with the flow and we call it a fate; but how we can forget another known philosophy of life?

i.e “You are the creator of your own destiny”

So if you are going with the flow then surely you are not creating or controlling your our destiny therefore you cannot blame the flow with which you are swimming in your life.

To feel the practice of joy of this quote you need to focus on developing your stone habits and life discipline to swim against the traditions and to make your own path in no matter which walk of life you are in right now!

It is the day when a thought, a philosophy or a vision is transformed into concrete reality. The philosophy becomes the guiding star for the institution to take form, grow and become an invincible reality as the Chairman Dr. A. F. Pinto laid the foundation stone of Taurian World School in 2008 with a vision to become the leading scholastic institution, by providing holistic education to our students.
